

MANU ZAVIER MICHAEL

Finance & Reporting Analyst | SAP FI/MM | Power BI | AP/AR & Reconciliation | P2P Operations
Kalaburagi, Karnataka, India | manumichael2000@gmail.com | +91 9633585879 | Open to relocation worldwide

SUMMARY

Four years in now, and I'm still deep in SAP FI/MM — reconciling bank, vendor, and GL accounts, running AP/AR end to end, and owning Procure-to-Pay across two different organisations, with a clean record on timely payments and closed reconciliation breaks along the way. Somewhere in there I also built the Power BI reporting suite my current team still runs every week, mostly because I got tired of chasing the same numbers across a dozen disconnected Excel files. What I'm looking for next: a Senior Finance Analyst or Reconciliation role, ideally with a shared-services team where this kind of work gets to scale.

CORE SKILLS

- Financial Reconciliation — bank, GL, and vendor accounts; daily break investigation via FBL1N, FBL3N, FBL5N
- Accounts Payable & Receivable — full invoice-to-payment cycle; F-02, F-44, F-32, FBRA, FBCJ, FB08, F.42, F.04
- Procure-to-Pay Management — proposal runs, exception handling, vendor payment cycles
- Month-End Close — accruals, journal entries, cut-off validation, GR/IR clearing
- Reporting & Analysis — Power BI dashboards, MIS reporting, variance analysis, Advanced Excel (VLOOKUP, Pivot Tables)
- Controls & Documentation — GAAP/IFRS-aligned internal controls, audit support, Desktop Procedures (DTPs)

PROFESSIONAL EXPERIENCE

Accounts Executive — Procure-to-Pay (P2P)

Fair Export Pvt. Ltd., Kalaburagi, India | April 2025 – Present

- I own the full reconciliation cycle across bank, vendor, and GL accounts — daily reviews in SAP through FBL1N, FBL3N, and FBL5N, chasing down every break until it's actually closed, not just flagged.
- I run payment processing start to finish: proposal runs, clearing open items through F-44 and F-32, posting via F-02, and sorting out bank rejections directly with partners so payments go out on schedule.
- Month-end close means document reversals (FB08, FBRA), cash postings (FBCJ), and GR/IR clearing. The same carry-forward errors kept resurfacing every month and I didn't have a real fix at first — so I rebuilt our vendor reconciliation templates in Excel from scratch, which is what actually cut the manual matching time and stopped the errors for good.
- None of this was in my original job description, but the reporting was scattered across a dozen Excel files and someone had to fix it, so I built the Power BI dashboards the team now uses to track AP aging, vendor outstanding balances, and cash movement.
- I've mentored two junior team members through reconciliation and SAP workflow — both were handling AP/AR independently within about two months — and wrote the Desktop Procedures we now use for audit prep and onboarding.

Accountant — Accounts Payable & Accounts Receivable

Ahalya Agencies, Kottayam, India | October 2022 – March 2025

- Ran the complete AP/AR cycle — invoice receipt, three-way matching, coding, approval routing, payment execution, and collections — across a high-volume, multi-vendor book.
- Reconciled vendor and bank accounts across multiple ledgers, tracing discrepancies back to source so the books were clean before management review.
- Supported month-end close through accrual entries and cut-off validation; the documentation held up through both internal and external audits.
- Put together daily, weekly, and monthly reports on cash position, payables outstanding, and AR aging, with variance commentary for senior management.

Trainee Accounts Officer — Audit Support

Ahalya Agencies, Kottayam, India | June 2022 – September 2022

- Supported bank reconciliations, ledger verification, and audit file preparation — this is where the habit of documenting everything carefully actually started.
- Built a working understanding of financial controls, compliance standards, and payment-cycle governance that's carried into every role since.

EDUCATION & CERTIFICATIONS

Bachelor of Commerce — Computer Applications (B.Com CA)

Mahatma Gandhi University, Kerala, India | 2019 – 2022

FMVA® (Financial Modeling & Valuation Analyst) — Corporate Finance Institute, in progress

QuickBooks ProAdvisor — Intuit, 2025

Advanced Excel Certification — 2023

Still working through the FMVA curriculum, and reading into treasury operations and fund structures on my own time — trying to build toward more analytical, senior-level finance work.
